

The **SAGE Link™** Total Zone Fracturing System is designed to provide a reliable method of fracturing across an entire lateral for increased connectivity with trapped reserves. **SAGE Link™** is a cost effective solution to ensure that all desired areas of interest are effectively stimulated regardless of length.

- Predictable pressure profiles
- High torque capability for open hole applications
- Remedial applications for existing perforations
- High build angle capability
- No pumping fluid flow back required
- High rate injection
- No fluid limitations
- Drill pipe connections
- Standard handling equipment

System OD	3-7/8"
System ID	2-5/32"
System Length	Unlimited
Pressure Rating	10,000 psi
Torque Rating	8,000 ft lbs
