

SageRider Tubing Conveyed Perforating Systems are designed to provide a wide variety of safe, reliable methods in which to optimize the perforating of Oil and Gas wells. Our personnel have been involved TCP and its innovation since its origination; and this experience shows through in our knowledgeable approach to every job. **SageRider** has perforating systems applicable to any well from vertical to horizontal, standard temperature to extra hi-temp, low BHP to high pressure. Our full array of support tools also gives us the ability to configure a tool string for virtually any set of well parameters.

RDX, HMX, HNS, and PYX Systems

DP, SDP, XDP, BH, GH and Custom Charges

Mechanical Firing

Direct Hydraulic, Differential Hydraulic Firing

Ball Actuated, Time Delayed Firing

Auto Vented Firing

Gun to Gun Delays

Underbalance, Overbalance and Circulating Tools

Variety of TCP Packers

Superior experience and design expertise
